### Important information

This simplified prospectus (hereinafter called the "Simplified Prospectus") contains key information about the Fund which is a sub-fund of Schroder International Selection Fund (hereinafter called the "Company"). If you would like more information before you invest, please consult the full prospectus.

Should any inconsistency arise between the translated and the English version of this document, the English version shall always prevail.

The rights and duties of the investor as well as the legal relationship with the Company are laid down in the full prospectus. The full prospectus and the annual and semi-annual reports may be obtained free of charge from Schroder Investment Management (Luxembourg) S.A. and from all Distributors.

### Investment objective

To provide capital growth primarily through investment in equity and equity related securities of European companies. In order to achieve the objective the Investment Manager will invest in a select portfolio of securities, which it believes offer the best opportunities for future growth.

### Use of financial derivative instruments

This Fund may employ financial derivative instruments for hedging and investment purposes in accordance with its risk profile. Financial derivative instruments can be used for instance to create market exposures through equity, currency, volatility or index related financial derivative instruments and include over-the-counter and/or exchange traded options, futures, contracts for difference, warrants, swaps, forward contracts and/or a combination of the above.

### Portfolio's risk profile

The value of the Fund is calculated daily on the basis of the latest values of the individual equities held by the Fund. This market value is highly influenced by the capital markets expectations for the securities held by the Fund but also by changes in interest rates. Due to the specialist nature of the equity securities held by the Fund a high level of volatility can be expected.

The Fund is a higher risk vehicle. In particular the use of financial derivative instruments for investment purposes may increase the Share price volatility, which may result in higher losses for the investor.

These are the principal risk factors. Investors should refer to the full prospectus for full details of all risk factors applying to this Fund.

### Performance of the portfolio

The Fund had not been in operation for a full year at the end of the Company's last financial year when figures for this Simplified Prospectus were taken. In accordance with the current rules and regulations relating to the Simplified Prospectus, the performance figures of a fund with less than one year's activity cannot be quoted.

### Performance disclaimer

Past performance is not a guide to future performance and may not be repeated. Investors may not get back the full amount invested, as prices of shares and the income from them may fall as well as rise.

### Profile of the typical investor

The Fund may be suitable for investors who are more concerned with maximising long term returns than minimising possible short term losses.

### Treatment of income

Dividends due on Distribution Shares will be paid out to investors provided the amount is above EUR 50 or its equivalent. However, the board of directors may decide that dividends be automatically reinvested by the purchase of further shares. No dividends will be distributed if their amount is below EUR 50 or its equivalent. Such amount will be automatically reinvested. No dividends will be distributed to holders of Accumulation Shares.
