Emerging Market Corporate Bond

a sub-fund of Schroder International Selection Fund SICAV

Class C Accumulation USD (LU0795635795)

This fund is managed by Schroder Investment Management (Luxembourg) S.A., which is a member of the Schroders Group.

Objectives and Investment Policy

Objectives

The fund aims to provide capital growth and income.

Investment Policy

At least two-thirds of the fund (excluding cash) will be invested in bonds issued by companies, governments and government agencies worldwide in various currencies. The bonds may include asset-backed securities and mortgage-backed securities. A maximum of 20% of the fund will be invested in bonds issued by governments.

The fund manager, supported by Schroders' global fixed income investment team, seeks to identify bonds issued mainly by governments or companies within emerging markets which offer the best possible risk/reward profile. Investing on a global basis allows investors to benefit from the best opportunities available around the world, and does not limit the fund manager to a single region or market.

The fund may also invest in other financial instruments and hold cash on deposit. Derivatives may be used to achieve the investment objective and to reduce risk or manage the fund more efficiently. The fund may use leverage and take short positions.

Benchmark

This share class is managed with reference to the JPM CEMBI Broad Diversified financial index. The manager invests on a discretionary basis and is not limited to investing in accordance with the composition of this benchmark.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Risk and Reward Profile

The risk and reward indicator

The risk category was calculated using simulated historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Other particular risks

Credit risk / debt securities: A security issuer may not be able to meet its obligations to make timely payments of interest and principal. This will affect the credit rating of those securities.

Financial techniques / derivative outcome: There is no guarantee that a financial derivative contract will achieve its intended outcome, even if the terms of the contract are completely satisfied.

Market risk / emerging markets & frontier: Emerging markets will generally be subject to greater political, legal, counterparty and operational risk.

Operational risk / third parties: The fund's operations depend on third parties and it may suffer disruption or loss in the event of their failure.
