Average Credit Rating

BBB+

Annual Volatility over 3 years (%)

2,18

The Running Yield reflects the income related to the Coupons of the instruments held in the portfolio as a percentage of their market value. The figure shown is a market value weighted average for the whole portfolio. It does not include any preliminary charge and investors may be subject to tax on distributions.

On 01/03/2018 Schroder ISF Asian Bond Absolute Return changed its name to Schroder ISF Asian Bond Total Return and changed its investment objective.

Julia Ho and Chow Yang Ang replaced Rajeev De Mello as Fund Manager for this fund on 28/02/2018.

Investment Objective and Policy

The fund aims to provide capital growth and income by investing in bonds issued by governments and companies in Asia. The fund invests at least two-thirds of its assets in bonds, derivatives related to these bonds and currencies. The bonds are issued by governments, government agencies and companies in Asia, which includes west Asian countries as described in the Prospectus. The fund is designed to participate in rising markets whilst aiming to mitigate losses in falling markets through the use of derivatives. The mitigation of losses cannot be guaranteed. The fund may invest in mainland China through the Renminbi Qualified Foreign Institutional Investor ("RQFII") scheme or regulated markets. The fund may invest up to 50% of its assets in bonds that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds). The fund may (exceptionally) hold 100% of its assets in cash. The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. The fund may use leverage and take short positions.

Performance Analysis

| Performance (%) | 1 month | 3 months | 6 months | YTD | 1 year | 3 years | 5 years | 10 years |
|-----------------|---------|----------|----------|------|--------|---------|---------|----------|
| Fund | -0,9 | -1,5 | 0,0 | -1,0 | 1,8 | 0,3 | -2,0 | 8,4 |
| Benchmark | -0,8 | -0,0 | 0,4 | 0,1 | 1,0 | 2,4 | 2,9 | 26,5 |

| Annual Performance (%) | 2017 | 2016 | 2015 | 2014 | 2013 |
|------------------------|------|------|------|------|------|
| Fund | 3,9 | 1,7 | -2,3 | 2,2 | -4,5 |
| Benchmark | 1,3 | 0,8 | 0,3 | 0,2 | 0,3 |

Performance over 5 years (%)

The return received may rise or fall as a result of currency fluctuations.

Past performance is not a reliable indicator of future results, prices of shares and the income from them may fall as well as rise and investors may not get back the amount originally invested.

The fund is not managed with reference to a benchmark but its performance may be measured against one or more.

All fund performance data are on a NAV to NAV basis, net income reinvested. Data is not available for the time periods with no % growth stated. In case a share class is created after the fund's launch date, a simulated past performance is used, based upon the performance of an existing share class within the fund, taking into account the difference in the ongoing charges and the portfolio transaction costs, and including the impact of any performance fees if applicable.

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. With effect from 01/08/2010 Schroder ISF Asian Bond changed its name to Schroder ISF Asian Bond Absolute Return. On 01/12/2011 the LIBOR 3 Months replaced the Citi Treasury / Agency TR. The full track record of the previous index has been kept and chainlinked to the new one. On 01/03/2018 the 50% Markit iBoxx Asian Local Currency + 50% JP Morgan Asian Credit replaced the LIBOR 3 Months. The full track record of the previous index has been kept and chainlinked to the new one. Source: Schroders

Risk Considerations

- **Capital risk / negative yields:** When interest rates are very low or negative, the fund's yield may be zero or negative, and you may not get back all of your investment.
- **China country risk:** Changes in China's political, legal, economic or tax policies could cause losses or higher costs for the fund.
- **Counterparty risk:** The counterparty to a derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the fund, potentially creating a partial or total loss for the fund.
- **Counterparty risk / money market & deposit:** A failure of a deposit institution or an issuer of a money market instrument could create losses.
- **Credit risk:** A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.
- **Currency risk:** The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.
- **Derivatives risk:** A derivative may not perform as expected, and may create losses greater than the cost of the derivative.
- **Emerging markets & frontier risk:** Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk.
- **High yield bond risk:** High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk.
- **Interest rate risk:** A rise in interest rates generally causes bond prices to fall.
- **Leverage risk:** The fund uses derivatives for leverage, which makes it more sensitive to certain market or interest rate movements and may cause above-average volatility and risk of loss.
- **Liquidity risk:** In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.
- **Onshore renminbi currency risk:** Currency control decisions made by the Chinese government could affect the value of the fund's investments and could cause the fund to defer or suspend redemptions of its shares.
- **Operational risk:** Failures at service providers could lead to disruptions of fund operations or losses.
- **Capital risk / distribution policy:** the expenses of this share class are paid out of capital rather than out of investment income. Capital growth will be reduced and in periods of low growth capital erosion may occur.

Holdings Analysis

| Top 10 Holdings | % NAV |
|---|-------------|
| 1. India Government Bond 8.2% 24/09/2025 | 6,9 |
| 2. Schroder ISF RMB Fixed Income | 6,6 |
| 3. Malaysia Government Bond 3.659% 15/10/2020 | 5,0 |
| 4. China Government Bond 3.77% 08/03/2025 | 4,3 |
| 5. Philippines Government Bond 5.75% 12/04/2025 | 3,6 |
| 6. Thailand Government Bond 1.25% 12/03/2028 | 3,3 |
| 7. Thailand Government Bond 3.65% 20/06/2031 | 3,0 |
