

# Schroder International Selection Fund Global Sustainable Food and Water

# Schroder ISF\* Global Sustainable Food and Water is a global equity portfolio that aims to deliver long-term capital growth by investing in companies driving the transition to make our food and water system more sustainable.

## Strategic Capabilities

**Alpha Equity**  
Targeting higher active equity

“  
It is estimated that around \$30 trillion of investment will need to be spent by 2050 to sustainably provide food and water to a global population of 10 billion.  
”

## Why invest?

Food and water account for 26% of global green house gas emissions<sup>1</sup>. It is estimated that around \$30 trillion of investment will need to be spent by 2050 to sustainably provide food and water to a global population of 10 billion and meet the 2 degree target set in the Paris accord<sup>2</sup>. We believe companies whose products and services are facilitating this movement will be in great demand and can exhibit strong long-term growth potential.

## Three structural changes and drivers enabling the change

### Higher agricultural yield and efficiency

**Structural change:** With limited land to use for farming, we need to think of ways to increase agricultural output without relying on more land.

**Driver:** Technology expected to step in to improve yield and efficiency using land we currently have.

### A change in global diet and eating patterns

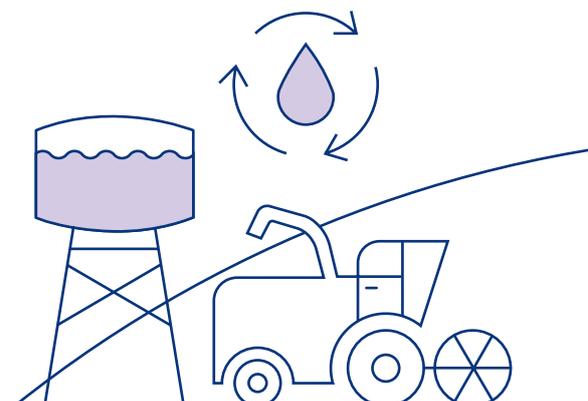

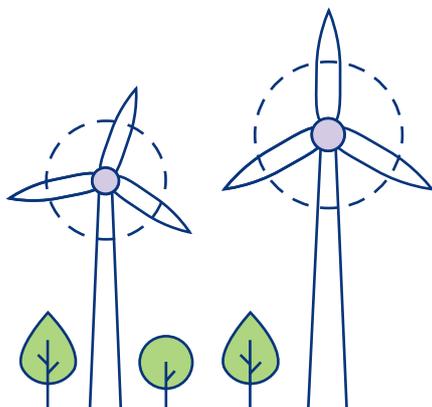

**Structural change:** Consumer focus was already shifting towards higher quality and healthier foods, and the pandemic has only accelerated this focus.

**Driver:** New dietary habits – growing consumer demand for organic products and sustainable products creates business opportunities for companies in the right place to take advantage of this shift.

### Major reduction in waste and emissions

**Structural change:** Shifting consumer demand and structure for higher yield cannot come at the expense of higher emissions and waste. We need to meet growing demand while reducing emissions.

**Driver:** Government actions around the world are still minimal, but this is expected to increase to support this change. We see regions starting to set targets to make the system more sustainable.

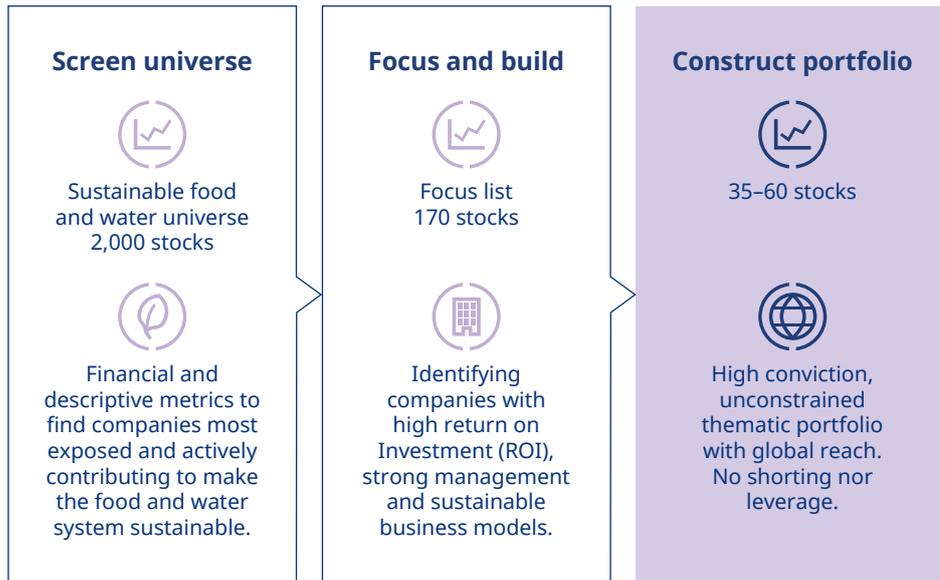

\*Schroder International Selection Fund is referred to as Schroder ISF throughout this document.

## Risk Considerations

- Currency risk: The fund may lose value as a result of movements in foreign exchange rates.
- Derivatives risk: Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.
- Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.
- Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.
- Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.
- IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.
- Sustainability Risk Factor: The fund has the objective of sustainable investment. This means it may have limited exposure to some companies, industries or sectors and may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria. Therefore, the fund may underperform other funds that do not apply similar criteria. The fund may invest in companies that do not reflect the beliefs and values of any particular investor.
- Emerging Markets & Frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

## Important Information

This document does not constitute an offer to anyone, or a solicitation by anyone, to subscribe for shares of Schroder International Selection Fund (the "Company"). Nothing in this document should be construed as advice and is therefore not a recommendation to buy or sell shares. An investment in the Company entails risks, which are fully described in the prospectus.

Subscriptions for shares of the Company can only be made on the basis of its latest Key Investor Information Document and prospectus, together with the latest audited annual report (and subsequent unaudited semi-annual report, if published), copies of which can be obtained, free of charge, from Schroder Investment Management (Europe) S.A.

Schroders may decide to cease the distribution of any fund(s) in any EEA country at any time but we will publish our intention to do so on our website, in line with applicable regulatory requirements.

The fund has the objective of sustainable investment within the meaning of Article 9 of Regulation (EU) 2019/2088 on Sustainability-related Disclosures in the Financial Services Sector (the "SFDR").

Any reference to sectors/countries/stocks/securities are for illustrative purposes only and not a recommendation to buy or sell any financial instrument/securities or adopt any investment strategy.

Past Performance is not a guide to future performance and may not be repeated.

The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise.

Schroders has expressed its own views and opinions in this document and these may change.
