KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

You are investing in a sub-fund of Schroder International Selection Fund (the “Company”). The Company is an umbrella structured open-ended investment company with limited liability in Luxembourg, organised as a “société anonyme” and qualifies as a Société d’Investissement à Capital Variable (“SICAV”) under Part I of the law on undertakings for collective investment dated 17 December 2010, as amended from time to time.

The Fund aims to provide capital growth and income by investing in inflation-linked fixed income securities.

Hedged Classes aim to provide you with the performance returns of the Fund’s investments in the Fund’s base currency (EUR) by reducing the effects of exchange rate fluctuations between the relevant Class currency and the Fund’s base currency.

Refer to the “Important Information”, “The Fund”, “The Sub-Funds” and “Investment Objectives and Strategies / Product Suitability” sections of the Prospectus for further information on features of the product.

¹ The Prospectus is available for collection from Schroder Investment Management (Singapore) Ltd or any of its appointed distributors during usual office hours or accessible at <http://www.schroders.com.sg>.

Investment Strategy

The Fund invests at least two-thirds of its assets in inflation-linked fixed income securities with an investment grade or sub-investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds) issued by governments, government agencies, supra-nationals and companies worldwide.

Refer to the "Investment Objectives and Strategies / Product Suitability" section of the Prospectus for further information on the investment strategy of the Fund.

The Fund may use derivatives (including total return swaps), long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently. The Fund may also invest in Money Market Instruments and hold cash.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of the product and its dividends or coupons may rise or fall. These risk factors may cause you to lose some or all of your investment and your principal may be at risk:

Refer to the "Risk Factors, Investments, Derivatives and Supplementary Information" section of the Prospectus for further information on risks of the product.

Market and Credit Risks

You are exposed to market risk.

- The value of investments by the Fund may go up or down due to changing economic, political or market conditions, or due to an issuer's individual situation.

You are exposed to credit risk.

- A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Liquidity Risks

You are exposed to liquidity risk.

- There is no secondary market for the Fund. All redemption requests should be made to the distributor of the Fund through whom you had originally purchased the Shares. The liquidity of the Fund may be limited if a significant portion of the assets of the Fund is to be sold to meet redemption requests in a short time frame.

Product-Specific Risks

You are exposed to negative yields risk.

- When interest rates are very low or negative, the Fund's yield may be zero or negative, and you may not get back all of your investment.

You are exposed to derivatives risk.

- The Fund may use derivatives as part of the investment process. The use of futures, options, warrants, forwards, swaps or swap options involves increased risk.

You are exposed to counterparty risk.

- The counterparty to a derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the Fund, potentially creating a partial or total loss for the Fund.

You are exposed to money market and deposit risk.

- A failure of a deposit institution or an issuer of a Money Market Instrument could create losses.

You are exposed to currency risk.

- The Fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

You are exposed to high yield bond risk.

- High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk.

You are exposed to interest rate risk.

- A rise in interest rates generally causes bond prices to fall.

You are exposed to leverage risk.

- The Fund uses derivatives for leverage, which makes it more sensitive to certain market or interest rate movements and may cause above-average volatility and risk of loss.

You are exposed to operational risk.

- Failures at service providers could lead to disruptions of fund operations or losses.

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

You may redeem Shares by completing a share redemption form ("Redemption Request") and submitting it to the relevant distributor through whom you originally purchased the Shares.

² Your financial adviser is required to disclose to you the amount of trailer fee it receives from the Management Company.

The directors of the Company reserve the right not to accept instructions to redeem (or switch) of more than 10% of the total value of the Shares in issue of the Fund on a Dealing Day. In these circumstances, the redemption of part or all Shares in excess of 10% will be deferred until the next Dealing Day.

The redemption proceeds are usually paid to you within 6 Business Days following the receipt of the Redemption Request by the Company or its administrative agent provided that the directors of the Company reserve the right to extend the period of payment of the redemption proceeds to such period, not exceeding 30 calendar days.

Your exit price is determined as follows:

- If you submit the Redemption Request by 5 pm Singapore time on a Singapore Business Day and such Redemption Request is accepted by the Management Company or its administrative agent by 1 pm Luxembourg time of the relevant Dealing Day, you will be paid a price based on the net asset value per Share on that Dealing Day.

The redemption proceeds that you will receive will be the exit price multiplied by the number of Shares redeemed. An example is as follows:

1000	x	\$11.0000	=	\$11,000.00
(Number of Shares)		(Net Asset Value per Share)		(Redemption Proceeds)
