

Fund objectives and investment policy

The Fund's investment objective is to provide capital growth and to outperform the MSCI World (NDR) TR Index over the medium to long term.

The Schroder Global Recovery Fund applies a disciplined value investment approach, seeking to invest in a select portfolio of securities that are significantly undervalued relative to their long-term earnings potential. The Fund invests in companies worldwide that exhibit classic recovery characteristics; companies that trade on low multiples of recoverable profits with good long-term prospects. Its major strength is the disciplined focus on buying out-of-favour companies at all stages in the investment cycle. While valuation-driven philosophies can fall in and out of favour, the Fund seeks to consistently apply a disciplined approach as over longer time periods this investment style has shown the potential to deliver higher returns.

The Fund may invest across a wide range of global assets including but not limited to equities, cash and cash equivalents, property trusts, exchange traded funds, futures, currency derivatives, options and listed equity market derivatives. Exposure to these asset classes may be achieved directly or via an investment in the Schroder International Selection Fund Global Recovery.

Past Performance is not a guide to future performance and may not be repeated.

The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.
