

I Accumulation USD | Data as at 31.05.2020

Fund objectives and investment policy

The fund aims to provide capital growth and income in excess of the MSCI AC World (Net TR) Index after fees have been deducted over a three to five year period by investing in equities of companies worldwide. The fund is actively managed and invests at least two-thirds of its assets in a diversified portfolio of equities of companies worldwide. The fund focuses on companies that have certain "Value" characteristics. Value means looking at indicators such as cash flows, dividends and earnings to identify securities which the investment manager believes have been undervalued by the market. The fund is managed with reference to material environmental, social and governance factors. This means issues such as climate change, environmental performance, labour standards or board composition that could impact a company's value may be considered in the assessment of companies. The Fund may also invest directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash. The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

Relevant risk as associated with this Fund are shown overleaf and should be carefully considered before making any investment.

Performance over 5 years (%)

Past Performance is not a guide to future performance and may not be repeated.

The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

Source: Morningstar, bid to bid, net income reinvested, net of fees. The fund's performance should be assessed against its target benchmark being to exceed the MSCI AC World index (Net TR) index, and compared against the MSCI AC World Value (Net TR) index and the MSCI World (Net TR) index. The majority of the fund's investments may be components of the target benchmark. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the target benchmark. The investment manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities. Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. From 29.02.2016 the MSCI AC World index, which includes emerging markets, replaced the MSCI World index as the primary index used for reference purposes. The MSCI World index has continued to be shown for further reference purposes. As the fund is unconstrained, the change in the reference indices has no impact on how the fund is managed or its performance. The rationale for the proposed change is to present the performance of this benchmark unconstrained fund to investors in the clearest and most representative manner.

The fund is not managed with reference to a benchmark but its performance may be measured against one or more.

Ratings and accreditation

Please refer to the Important information section for the disclosure. The above are external ratings and the internal ESG accreditation.

I Accumulation USD | Data as at 31.05.2020

5 year return of USD 10,000

Past Performance is not a guide to future performance and may not be repeated.

The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

Risk considerations

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

Derivatives risk - Efficient Portfolio Management and Investment Purposes: Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. When the value of an asset changes, the value of a derivative based on that asset may change to a much greater extent. This may result in greater losses than investing in the underlying asset.

Emerging Markets & Frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Synthetic risk & reward indicator (SRR)

LOWER RISK

Potentially lower reward

HIGHER RISK

Potentially higher reward

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed and may change over time. A fund in the lowest category does not mean a risk-free investment. A fund is in categories 1 to 3 where it can take lower risks in search of potentially lower rewards and its price may rise and fall accordingly. A fund is in categories 4 to 7 where it can take higher risks in search of potentially higher rewards and its price may rise and fall accordingly.

Risk statistics & financial ratios

Important information

This document does not constitute an offer to anyone, or a solicitation by anyone, to subscribe for shares of Schroder International Selection Fund (the "Company"). Nothing in this document should be construed as advice and is therefore not a recommendation to buy or sell shares. Subscriptions for shares of the Company can only be made on the basis of its latest Key Investor Information Document and prospectus, together with the latest audited annual report (and subsequent unaudited semi-annual report, if published), copies of which can be obtained, free of charge, from Schroder Investment Management (Europe) S.A. The Company is a Luxembourg-registered UCITS recognised in the UK under Section 264 of the Financial Services and Markets Act 2000. There will be no right to cancel any agreement to purchase shares. If shares are purchased directly or through an overseas agent not authorised to carry our regulated activities in the UK, all or most of the protection provided by the UK regulatory system will not apply to investments in the Company and compensation will not be available under the UK Financial Services Compensation Scheme and the Financial Ombudsman Service. An investment in the Company entails risks, which are fully described in the prospectus. This document is issued by Schroder Investment Management (Europe) S.A., 5, rue Höhenhof, L-1736 Sennigerberg, Luxembourg. Registered No. B 37.799. Approved for issue in the UK by Schroder Investment Management Limited, 1, London Wall Place, London EC2Y 5AU. Authorised and regulated by the Financial Conduct Authority. Schroders has expressed its own views and opinions in this document and these may change.

Benchmark: The target benchmark has been selected because the target return of the fund is to deliver the return of that benchmark as stated in the investment objective. Any comparator benchmarks have been selected because the investment manager believes that the benchmarks are a suitable comparison for performance purposes given the fund's investment objective and policy. The fund is not expected to replicate the holdings or performance of any benchmark.
