Sustainable EURO Credit

a sub-fund of Schroder International Selection Fund SICAV

Class A Accumulation EUR (LU2080993616)

This fund is managed by Schroder Investment Management (Europe) S.A., which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth and income in excess of the ICE BofA Merrill Lynch Euro Corporate Index after fees have been deducted over a three to five year period by investing in bonds denominated in Euro issued by companies worldwide, which meet the investment manager's sustainability criteria.

Investment policy

The fund is actively managed and invests at least two-thirds of its assets in bonds denominated in or hedged to Euro issued by companies and other nonsovereign bond issuers, governments, government agencies and supranationals worldwide.

The fund maintains a higher overall sustainability score than ICE Bank of America Merrill Lynch Euro Corporate index, based on the investment manager's rating system. The fund invests at least 10% of its assets in green, social and/or sustainable bonds.

The fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability Information" on the Fund's webpage, accessed via www.schroders.com/en/lu/private-investor/gfc.

The fund invests in companies that have good governance practices, as determined by the investment manager's rating criteria. The investment manager may also engage with companies held by the fund to challenge identified areas of weakness on sustainability issues. More details on the investment manager's approach to sustainability are available in the prospectus and on the website

www.schroders.com/en/lu/private-investor/strategic-capabilities/sustainability/disclosures

The fund may invest:

- up to 30% of its assets in sub investment-grade bonds (being bonds with a

credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies);

- up to 20% of its assets in sovereign government bonds;

- up to 20% of its assets in asset-backed securities and mortgage-backed securities; and

- up to 20% of its assets in convertible bonds including up to 10% of its assets in contingent convertible bonds. The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash (subject to the restrictions provided in the prospectus).

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

Benchmark

The fund's performance should be compared against its target benchmark being to exceed the ICE Bank of America Merrill Lynch Euro Corporate Index. The fund's investment universe is expected to overlap materially with the components of the target benchmark. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the target benchmark. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund. Please see appendix III of the fund's prospectus for further details.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Risk and reward profile

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it seeks to provide rewards whilst limiting price volatility.

Risk factors

ABS and MBS risk: The fund may invest in mortgage or asset-backed securities. The underlying borrowers of these securities may not be able to pay back the full amount that they owe, which may result in losses to the fund.

Contingent convertible bonds: The fund may invest in contingent convertible bonds. A reduction in the financial strength of the issuer of such bonds may result in losses to the fund.

Sustainability risk: The fund has environmental and/or social characteristics. This means it may have limited exposure to some companies, industries or sectors and may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the investment manager. The fund may invest in companies that do not reflect the beliefs and values of any particular investor.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk.

Interest rate risk: The fund may lose value as a direct result of interest rate changes.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Derivatives risk: Derivatives may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Charges

One-off charges taken before or after you invest

Entry charge 3.00%

Exit charge None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.
