

**Fund objectives and investment policy**

The fund aims to provide capital growth by investing in equities of companies worldwide.

The fund invests at least two-thirds of its assets in equities of companies worldwide. 'Alpha' funds invest in companies in which the manager has a high conviction that the current share price does not reflect the future prospects for that business. The manager seeks to identify companies which he believes will deliver future earnings growth above the level expected by the market typically on a 3-5 year horizon (we term this 'a positive growth gap'). The fund is managed with reference to material environmental, social and governance factors. This means issues such as climate change, environmental performance, labour standards or board composition that could impact a company's value may be considered in the assessment of companies. The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. The fund may also hold cash.

This fund may use financial derivative instruments as a part of the investment process. Derivatives carry a high degree of risk and should only be considered by sophisticated investors.

Source: Morningstar, bid to bid, net income reinvested, net of fees. The distributions are not guaranteed. Ordinarily, they will be reviewed annually. In the event of the Fund's income and realised gains being less than indicated distribution amount per unit per annum, distributions will be made from capital. Investors should be aware that the distributions may exceed the income and realised gains of the Fund at times and lead to a reduction of the amount originally invested, depending on the date of initial investment.

The fund is not managed with reference to a benchmark but its performance may be measured against one or more. Where 'since inception' performance figures are stated, please note that the inception date is the same as the share class launch date under 'Fund Facts'.

### Return of USD 10,000

**Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.**

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.
