

Fund objectives and investment policy

To achieve a return of CPI plus 4% to 5% p.a. before fees over rolling 3-year periods while minimising the incidence and size of negative returns in doing so. CPI is defined as the RBA's Trimmed Mean, as published by the Australian Bureau of Statistics.

The Fund may invest across a broad array of asset classes within the major categories of growth, diversifying and defensive assets. The Fund may also use derivatives and active currency management. The permitted asset allocation ranges are set out below:

Asset classes / Investment ranges

Growth assets, typically shares and property securities, offer potentially the highest return but also the highest volatility. 0% - 75%
Diversifying assets, typically higher yielding debt and alternatives, offer higher potential returns usually with an income generating focus which assist in diversifying the portfolio's sources of return. 0% - 75%

Defensive assets, typically investment grade debt securities and cash and cash equivalents, are relatively secure with lower volatility. 0% - 100%

Past Performance is not a guide to future performance and may not be repeated.

The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

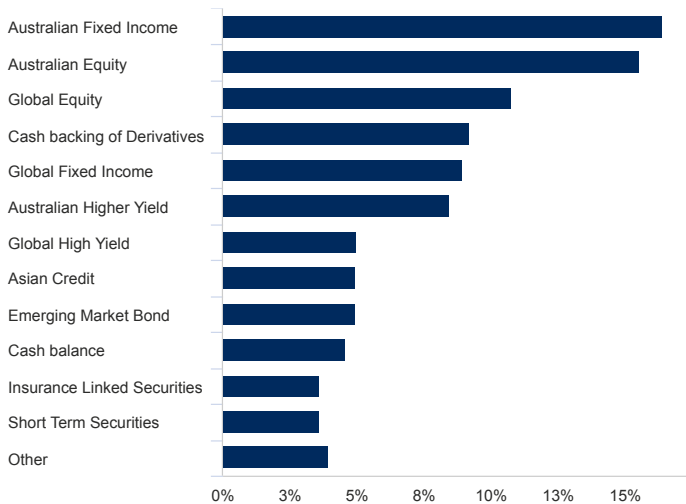

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.
